Captura desde IOT Central historial de comandos:

The screenshot displays the Azure IoT Central interface for a device named "Rack C - Python (DPS/MQTT)". The device is shown as "Connected" with the last data received on 9/22/2026 at 1:22:28 PM. The interface includes tabs for "View", "Command", "Raw data", "Mapped aliases", and "Files". A "Run" button is visible for the "Rack Monitor / reboot" command. The "History - reboot" panel shows a successful response from the device, indicating the simulated restart is complete.
